PFA Lined Magnetic Drive Centrifugal Pumps
Efficient – Non-Corroding – Vacuum-Resistant

MKPL
Magnetic drive chemical process pump

MKPL-S
Self-priming magnetic drive chemical process pump

Designed to:
DIN EN ISO 2858, 5199 and 15783

Compliant with:
EC Directives 2006/42/EC (Machinery) and 94/9/EC (ATEX)

cleaner pumps, cleaner planet™
Open impeller of PFA lined magnetic drive pumps
Our company
CP is a highly innovative Swiss company with a rich tradition. For over 60 years, we have specialised in developing and manufacturing premium quality high-tech products and providing services for international customers with the most rigorous requirements.

We produce reliable and innovative centrifugal pumps for the chemical, pharmaceutical, biotechnology, food and beverage, and pulp and paper industries. Through our network of representatives in more than 40 countries, we offer first-class advice and ensure efficient customer service locally, around the world.

Reflecting our deep commitment to energy efficient products and services, we deliver environmentally friendly solutions that always go hand in hand with maximum safety and economy. As a pioneer in this area, we advise and assist customers with a wide range of needs – throughout the value chain.

CP operates a quality management system certified to ISO 9001:2008.

Energy efficiency in industry
Nowadays, industry is facing increasing demands to improve sustainability and energy efficiency. Pumps are considered to play a key role because they offer vast potential to save energy and costs. Already recognising this back in 1999, CP took action and has become a pioneer in energy-saving pumping systems.

In recent years, we have continuously enhanced the hydraulic performance of numerous pump systems, increasing their efficiency by up to 30 per cent. At the same time, we have steadily improved pump safety, a mission we have vigorously pursued ever since our company was established in 1948.

We are wholeheartedly committed to promoting sustainable manufacturing in industry around the world. Our customers benefit from a comprehensive range of solutions that reduce costs and CO₂ emissions over the long term. Cleaner pumps, cleaner planet: we firmly believe that sustainable research, thinking and action always pay off for everyone.

PFA lined magnetic drive centrifugal pumps
With their sealless design, the MKPL and MKPL-S magnetic drive pumps are ideal to meet the stringent requirements of chemical processing and a multitude of other industries. These highly advanced and extremely energy efficient pumps are built to handle a huge variety of corrosive fluids reliably and absolutely safely, especially even in high temperature applications.

The pump casing has a thick, heavy-duty, corrosion- and permeation-resistant PFA lining positively, mechanically locked into the metal armour, ensuring vacuum resistance. This armour absorbs all mechanical stresses that can result from system pressure or piping nozzle loads.

Made of pure SSIC (sintered silicon carbide) in a robust design engineered for ceramics, the bearing assembly provides maximum reliability of pump operation. Plain and thrust bearings are secured with polygonal form-fit, self-centring anti-rotation devices. Even at high temperatures, the PFA lined metal plain bearing carrier maintains a constant clearance between the impeller and casing.

The MKPL and MKPL-S pumps come with either an open impeller for low NPSH or a closed impeller for high efficiencies. Featuring a metal core for increased mechanical strength, their plastic impellers are firmly secured to prevent loosening in case of reverse pump rotation.

Both pumps are constructed with just a few, robust components using an intelligent modular system that facilitates assembly and minimises the costs of spare parts, maintenance and servicing.
MKPL
PFA Lined Magnetic Drive Chemical Process Pump

Designed for operating at up to +200°C, the MKPL pump is built for safety in handling corrosive fluids in high temperature applications. Its connection dimensions and performance data conform to DIN EN ISO 2858, making the MKPL easy to retrofit into any installation to replace old pumps.

MKPL-S
PFA Lined Self-Priming Magnetic Drive
Chemical Process Pump

The MKPL-S features an integral priming chamber in the casing. A separate priming tank is not necessary because the pump evacuates the suction line itself by creating a vacuum. The MKPL-S can even readily pump entrained air in the suction line while running, thus increasing reliability of operation. This pump achieves suction lifts up to 8.5 m.

Applications
Versatile – Complex – Special

CP’s PFA lined magnetic drive pumps are engineered to meet the most stringent quality standards and ensure reliability and utmost safety in production operations. Suitable for many different fluids in a variety of industries and processes, they are capable of handling low, medium and high flow volumes. PFA lined magnetic drive pumps from CP offer tremendous advantages, especially in pumping sensitive or hazardous substances.

Industries
- Chemical processing: basic and fine chemicals (agrochemicals, speciality chemicals)
- Pharmaceuticals
- Biotechnology processing

Processes
CP’s PFA lined magnetic drive pumps are designed for a wide range of processes, including:
- Chlor-alkali electrolysis
- Sulphuric acid recycling
- Tank unloading

Fluids
CP’s PFA lined magnetic drive pumps can handle hot and/or highly concentrated acids, alkalis (bases), solvents and diffusing fluids. For example:
- Bromine
- Chlorine
- Nitric acid
- Phosgene
- Potassium hydroxide solution
- Sodium hydroxide solution
- Sulphuric acid

Our sales staff will be glad to give you personalised advice tailored to your specific needs, industry, processes and fluids.
PFA lined metal plain bearing carrier
Options
Comprehensive – Individual – Combinable

Casing

Materials
- PFA lined cast iron

Pressure rating
- PN 16

Connection flanges
- Flange to EN 1092-2
- Flange drilled to ANSI/ASME B16.5

Additional connections
- Casing drain (with or without flange)
- External flush connection for bearing lubrication and/or cooling the magnet assembly
- Lantern monitoring connection

Gasket materials
- PTFE
- PTFE/graphite

O-ring materials
- FEP/FKM
- Kalrez®/Chemraz®

Bearing assembly

Materials
- SSiC (sintered silicon carbide)
- SSiC with diamond-like coating (ADLC)
- SSiC with FuturaSafe® diamond coating

Containment shell

Materials
- Carbon fibre reinforced PTFE
- Heat-resistant carbon fibre reinforced PTFE
- Carbon fibre reinforced PVDF

Double-walled containment shell with leakage monitoring
The options vary depending on the pump model. Our sales staff will be glad to advise you in detail.

**Pump protection**
- Containment shell monitoring
- Double-walled containment shell with leakage monitoring
- Pt100 temperature probe
- Motor load sensor

**Mount**
- **Type**
  - Baseplate
- **Materials**
  - Steel
  - Stainless steel
- **Stilts**
- **Drip pan**

**Bearing frame**
- **Lubrication**
  - Oil lubrication
  - Grease lubrication
- **Oil lubrication options**
  - Hermetic seal (MagTecta OM™)
  - Constant level oiler
  - Oil cooling with or without thermostat
- **Coupling**
- **Coupling guard**
  - Steel
  - Brass

Customer service
We offer the highest quality, many years of experience and first-class advice from a single source. Our bespoke pump systems meet a wide range of different requirements.

CP’s customers benefit from a full service offering: the fastest availability of genuine spare parts, a complete set of technical documentation, competent and efficient customer support, and a dynamic and flexible repair service. All these services ensure that your pumps will operate faultlessly. Having representatives in more than 40 countries, we can provide local advice and support directly to our customers where required.

Energy efficiency consulting
As a trend scout specialised in energy efficiency, CP can deliver a wide spectrum of services relating to pumps and motors: comprehensive advice, in-depth system analysis, meticulous planning and design. Our goal is to actively help our customers optimise the energy consumption of their pumping systems and thereby cut costs over the long term.

Backed by our many years of broad experience, we today advise and assist customers in both the private and public sectors. These include owners and operators of fluid processing plants in the chemical, pharmaceutical and diverse other industries.

Are you interested? Do you have any questions? We would be happy to discuss all the different options with you personally.
